

## Product factsheet

# WasteShark by RanMarine

Hardware product or technological device

#### **Description**

Inspired by the whale shark, the WasteShark is a small autonomous surface vessel (ASV) that excels in efficiently handling aquatic waste. Featuring a sleek yet robust design reminiscent of a small catamaran with a centrally positioned basket between the hulls, the WasteShark

#### WasteShark by RanMarine

Published in the Water Europe Marketplace

integrates a diverse array of sensors and cutting-edge technologies. This thoughtful combination enables seamless navigation and meticulous cleaning of water bodies, guaranteeing a highly effective waste management solution.

Notably, the WasteShark boasts several advantages, including its eco-friendliness with zero greenhouse emissions, versatility in applications, low cost, ease of operation and portable deployment.

#### Target audience

serves diverse sectors including port authorities, municipalities, aquaculture facilities, industrial waterfront operations, environmental consultancies, and research institutions.
