

## Product factsheet

# RE-ACTOR

Software solution

## Description

DSS for the evaluation of new investments and actions related to water reuse and circular economy solutions within the urban water cycle. Scope of application: regional level.

Target audience

Decision-makers on urban water investments. Competent administration.

## Actors, their roles and interactions

- Technology providers, industries to provide with data to feed the economic and technical models.
- Water utilities, planners, and decision makers as end-users.

## Unique selling points

Main added value of the RE-ACTOR is its ability to quickly assess different scenarios and its user friendly interface. The end-user will be able to easily analyze complex potential investments and scenarios to prioritize those showing highest cost-benefit potential.

## Technical requirements

Internet and minimum requirements to access the web app.

## Software data

- Version: v1.0 (alpha)
- Initial release: 2023
- Operating environments:
  - SaaS - Web application

## Technologies applied by the product

- [Energy recovery technologies](#)
- Membrane systems

## Costs

To be defined.

## Technology Readiness Level

Level 7

## Case Study applying the product

### Alicante, Spain
